Mr. Weisberg,

I recently bought David Wrone's assassination bibliography and found your name in it. I haven't read any of your books but I have read Lane's & Thompsons and they convinced me there was a conspiracy to kill Kennedy. Your books however are not available in this area.

I would like to ask you how I can get any of your books and which of them you feel are the best.

Also are you doing anything at present to pursue the Investigation of Kennedys death and what is there I can do to get the investigation reopened

Thank You

Mike Duffy
